

The New Color of Money

Safer. Smarter. More Secure.

Soon you'll begin seeing the newly designed U.S. currency, with subtle background colors and enhanced security features. But one thing will never change: The old bills will always be worth just as much as the new. All bills are good. For good.

Security Thread

Look closely for the embedded plastic security thread — visible from both sides. You'll find a tiny flag and the words "USA TWENTY."

Watermark

Hold the bill up to the light and look for the faint image similar to the portrait. It's part of the paper itself, and you can see it from both sides.

Color-Shifting Ink

Tilt the bill up and down, and the color-shifting ink in the number "20" in the lower right corner changes from copper to green and back.
